Issue 21 • Winter 2023-24 CL1

San Diego Has Gone Green!

Department (ESD) 2023 has been the year of organic waste recycling. For the first nine months of the year, ESD distributed more than 213,000 green recycling bins and added 200 new weekly organic recycling collection routes to City-serviced customers. These efforts have resulted in over 70,000 tons of organic waste collected since the

rollout began in January, compared to a total of 35,000 tons collected in all of 2022. As part of the rollout of green bins, ESD used a variety of channels to promote and educate residents about the expansion of organics collection including webinars, workshops, billboards, social media and local television and radio.

Organic waste recycling provides an important opportunity to reduce the number of materials that decompose in the landfill and create methane gas. Methane is a harmful greenhouse gas that traps the sun's heat and contributes to climate change. San Diego has the Miramar Greenery where organics are processed locally to produce nutrient-rich compost that's great for integrating back into gardens, parks and open space.

Residents are encouraged to close the loop on organics by getting free compost at the Miramar Greenery and it back into their garden and potted plants. Learn more at potted plants. Learn more at a consciewasteRecycleSD.org.

Next Steps

Thank you for doing your part! The new collection program makes it easy for you to divert your organic waste - food scraps, food-soiled paper and

yard trimmings - from the trash. You don't have to be perfect to make a difference with your green bin. Start with whatever is easiest for you, whether it's an apple core, coffee grounds or

or the City's Environmental Services | your grass and leaves. Just remember: your green bin can be put out every week for collection, even if it's not full. If you are not sure what goes where, check out the next page for more information.

> Additional and Replacement Bins

green containers for free in 35-, 65- and 95-gallon sizes if you're noticing that your bin is too full. When bins are set out for collection, lids must be closed to keep material from falling out onto the street and into a storm drain when emptied. Bins and lids should be replaced when cracked or damaged. If you need additional bins, or to change use size of your bin, or to replace a broken bin or missing lid and gov/get-it-done, email

trash@sandiego.gov or call 858-694-7000.

Tips for a Clean Green Bin With the addition of food waste, some residents

We offer second

want to wash their bins. In order to keep trash and debris from going into storm drains, hose out bins away from the street. There are also private companies that clean bins for a fee. For more information visit sandiego.gov/ bincleaningtipsandservices.

LINE

Line the bottom of

your green bin with yard waste, newspaper or paper bags.

RINSE Wrap food scraps Rinse your empty green bin with in newspaper or a paper bag before water over a depositing into the landscaped area. green bin.

Free Mattress Recycling is Here!

D id you know the City's Environmental Services Department (FSD) annually collected. ment (ESD) annually collects more than 8,000 mattresses - weighing approximately 220 tons - that are left abandoned in canyons, streets, parks and alleys?

When buying a new mattress in California, a \$10.50 recycling fee is added to the final purchase price. This fee helps cover the cost of recycling a mattress that is likely being replaced. What many consumers might not know is when a mattress is delivered to a customer, retailers are required to pick up the old mattress it is replacing when

the new one is delivered or within 30 days of purchase. This includes most mattress brands, including futons, that are purchased from a store or online.

However, if you purchase a new mattress and take it home, retailers are not required to pick up and recycle the old one. In that situation, ESD has a free Mattress Collection Site at the entrance to the Miramar Landfill at 5161 Convoy St. at Highway 52.

The Mattress Collection Site hours are Monday - Friday 7 a.m. to 4 p.m. Closed Saturdays and Sundays and major holidays. For more information visit sandiego.gov/mattressrecycling

ESD's free mattress drop-off is available to the public, with a 10-mattress limit.

Lithium-ion Batteries Can Cause Truck Fires

It might not seem like much, but placing lithium-ion batteries in the trash or recycling bin is dangerous and can potentially cause a fire. Lithium-ion batteries - which are used in cell phones, laptops and other electronic devices - are considered hazardous waste when discarded, and are not allowed to be placed in the black, blue or green bins.

Lithium-ion batteries can spark and ignite paper in your trash or recycling bin, truck or recycling sorting facility.

All batteries, regardless of size, need to be properly recycled. To find a location to recycle batteries near you visit sandiego.gov/ batteryrecycling.

City of San Diego residents can dispose of batteries, along with other hazardous materials, for free at the City's Household Hazardous Waste Transfer Facility. To schedule an appointment, or learn more about what materials are accepted, visit sandiego.gov/get-it**done** or call 858-694-7000.

Polystyrene foam doesn't biodegrade, it's lightweight, breakable, and is usually only used once before being thrown away. Due to its light weight, it can easily find its way into our bays and beaches and can be ingested by wildlife. Recycling polystyrene foam is difficult and expensive.

Plastic straws and utensils are also a nuisance material in the environment for similar reasons, and straws are one of the most common forms of litter collected on California beaches. Plastic straws and utensils are not accepted in local recycling programs because they can't be pulled out in the recycling process.

To address the issues of polystyrene foam, plastic utensils and straws, San Diego's Single Use Plastic Reduction Ordinance (SUPRO) went into effect on April 1, 2023. This law prohibits most polystyrene foam products from being distributed or sold in the City of San Diego. This includes foodservice ware like plates, cups and take-out containers. SUPRO also requires plastic utensils and straws to only be provided upon the request of the customer.

Small businesses with gross revenues of less than \$500,000 per year are exempted from the law until April 1, 2024.

SUPRO will help San Diego reach its Zero Waste and Climate Action Plan goals and help maintain clean and beautiful beaches and public spaces. You can help reduce waste by bringing your own reusable mug, utensils or take-out containers when you eat out. Thanks for helping make a difference!

Help Us Get it Done

The best tool residents have for waste and recycling questions and services is going online and using Get It Done at sandiego. gov/get-it-done or by using the Get It Done mobile app.

Get It Done allows residents to do the following:

- Check and report missed collection.
- Check your collection schedule.
- Replace damaged containers.
- Order additional containers.
- Report illegal dumping.
- Make a hazardous waste drop-off appointment.
- Set up ADA assisted collection.

Christmas Tree Recycling Marks 50th **Anniversary**

Christmas Tree Recycling is one of the Environmental Services Department's Iongest-running collection programs, as 2023 marks the 50th year serving the community.

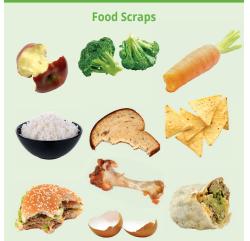

Residents have two options for recycling their Christmas tree: it can be cut to fit into the green collection bin (with lid completely closed) or be taken to one of 16 Christmas tree drop-off sites located throughout San Diego (please note, the Miramar Greenery is no longer a free drop-off site). Drop-off sites will be open from Dec. 26, 2023 - Jan. 23, 2024. Visit *RecyclingWorks.com* or call 858-694-7000 for more information.
